

Lab 14

Part A

Given is the following **Lab14PartA** project:

- Write a Spring unit test for the `findByAccountHolder()` method in the repository.
- Add 2 more query methods in the **AccountRepository** and write tests to test these methods.
- Write Spring unit tests for the **AccountService** class.
- Write Spring unit tests for the **AccountController** class.

Part B

Given is the **Lab14PartB** project. It is a Book REST webservice project. It contains already 1 RestAssured test. Write RestAssured tests for all methods of the **BookController**.

What to hand in?

- A zip file for part A
- A zip file for part B
